

Junior Project Engineering Journal

Kevin Ridsen

October 28, 2011

1 Wednesday, September 7, 2011

- Draft initial client email
- Setup meeting with PM

2 Thursday, September 8, 2011

- Send initial client email

3 Friday, September 9, 2011

- Setup weekly group meetings
- Setup weekly client meetings

4 Saturday, September 10, 2011

- Receive responses from Allie

5 Sunday, September 11, 2011

- Examine django as possible web framework
- Send out group meeting agenda
- Send out client meeting agenda

6 Monday, September 12, 2011

- Setup GitHub repos - one for docs and one for code

7 Tuesday, September 13, 2011

- Brainstorm possible account/non-account items for proposal

8 Wednesday, September 14, 2011

- Change weekly client meeting time for next week only
- Send out group meeting agenda

9 Thursday, September 15, 2011

- Add part of Milestone 1

10 Friday, September 16, 2011

- Finalize Milestone 1
- Submit Milestone 1 to PM

11 Saturday, September 17, 2011

- Setup Development VM

12 Sunday, September 18, 2011

- Distribute Development VM to Trey
- Setup django test app locally

13 Monday, September 19, 2011

- CSSE VM initial setup
- Email meeting notes and tasks

14 Tuesday, September 20, 2011

- Send out client meeting agenda
- Send out group meeting agenda
- Organize group's questions for client

15 Wednesday, September 21, 2011

- Revise Milestone 1 content
- Review Milestone 2 questions

16 Thursday, September 22, 2011

- Revise Milestone 1 content
- Draft weekly status report
- Finalize Milestone 1

17 Friday, September 23, 2011

- Submit Milestone 1

18 Sunday, September 25, 2011

- Send out group meeting agenda
- Sent out client meeting agenda

19 Tuesday, September 27, 2011

- Generate use cases

20 Wednesday, September 28, 2011

- Compile materials to send to client
- Setup project on Redmine

21 Friday, September 23, 2011

- Send materials to client
- Prepare Milestone 2
- Generate Weekly Status Report

22 Sunday, September 25, 2011

- Prepare agenda for weekly group meeting
- Send out client meeting agenda

23 Tuesday, September 27, 2011

- Work on use cases
- Review Django templating system

24 Wednesday, September 28, 2011

- Prepare agenda for weekly group meeting
- Setup Redmine for our project

25 Thursday, September 29, 2011

- Send revised Milestone 1 to Allie
- Integrate use cases into Milestone 2
- Split Milestone 2 document

26 Friday, September 30, 2011

- Submit Milestone 2 to PM

27 Sunday, October 2, 2011

- Send meeting agenda to Allie

28 Thursday, October 6, 2011

- Revise Milestone 2
- Update weekly status report

29 Friday, October 7, 2011

- Compile Milestone 2
- Submit Milestone 2

Week 9/1-9/7 Summary

The project has been going well so far. We have chosen to explore Django as our framework for the project and have started to review it. I have run through the Django tutorial and am comfortable with it. I have worked on getting Redmine setup on our VM since we will be using it for change management and bug tracking. This will allow us to prioritize our efforts and keep track of what needs to be completed. I have been in contact with Allie and the weekly client meetings have been progressing as planned. We have been getting all of our questions answered. Finally, the milestones have been progressing well with each person getting their work completed. There is a small issue with a team member not submitting their work by the specified deadline, but hopefully that works out better for the next milestone.

30 Sunday, October 9, 2011

- Send out weekly group meeting agenda
- Work on Milestone 3

31 Monday, October 10, 2011

- Send out weekly client meeting agenda

32 Tuesday, October 11, 2011

- Work on Milestone 3

33 Wednesday, October 12, 2011

- Compile Milestone 3
- Submit Milestone 3 to PM

Week 9/8-9/14 Summary

Since this week was fall break there is not much to report on other than that we worked on Milestone 3 and submitted it to the PM. Working with Allie has gone smoothly and she is still providing quick responses to our queries. We feel like we have a good handle on the scope of the project and the idea is taking shape in our heads. Once again though I had to deal with a late submission for the milestone even though I was in South Dakota. I was in communication with the team via email from SD and submitted milestone 3 to the PM.

34 Sunday, October 16, 2011

- Change weekly client meeting time

35 Monday, October 17, 2011

- Send client on campus meeting location

36 Tuesday, October 18, 2011

- Revise Milestone 2
- Compile Milestone 3
- Submit Milestone 3

37 Wednesday, October 19, 2011

- Meeting with Allie in person

38 Thursday, October 20, 2011

- Work on Milestone 4
- Compile Milestone 4
- Update weekly status report

39 Friday, October 21, 2011

- Submit Milestone 4 to PM
- Fill out peer evaluations

Week 9/15-9/21 Summary

We were excited to meet with Allie on campus on Wednesday. The meeting went well and she clarified a few more points that we were unsure of. Furthermore, Allie reviewed milestones 2 and 3 in order to give us some feedback on them. We were able to incorporate some of these changes into milestone 4. I compiled milestone 4 and had again to deal with a late submission. When I filled out the peer evaluations I took this late submissions and some missing of meetings into account.

40 Sunday, October 23, 2011

- Cancel weekly client meeting

41 Wednesday, October 26, 2011

- Revise Milestone 4
- Place features on Redmine
- Email client about usability study

42 Thursday, October 27, 2011

- Compile Milestone 4
- Update weekly status report

43 Friday, October 28, 2011

- Submit Milestone 4

Week 9/22-9/28 Summary

Since we met with Allie on Wednesday in person, we decided to cancel our typical Skype call with her. This allowed us to work on fixing parts of Milestone 4 and getting a head start on milestone 5. I was able to start putting information into Redmine that we will use for next quarter for development. Since we also got a good start on the usability study stuff, I was able to email Allie and get a response relating to the number of researchers she could get a hold of. We decided to meeting during the project work time, but one member decided not to show or commit his work on time. This is once again consistent with his prior behaviour and the peer evaluation. Overall, we were still able to finish milestone 4 and submit it.
