

Junior Project Engineering Journal

Chris Gropp

September 16, 2011

1 Wednesday, September 7, 2011

- Met with team

2 Sunday, September 11, 2011

- Met with team
- Took job of writing editor; begin working with Milestone 1

3 Monday, September 12, 2011

- Met with client (skype)
- Mused on required data connections and what we can get away with, account-wise
- Created GitHub account

4 Tuesday, September 13, 2011

- Briefly suggested account concepts at the end of classtime - fleshed them out later
- Reviewed sample milestones received from Kevin
- Broke milestone 1 into person-sized pieces for distribution at next meeting

5 Wednesday, September 14, 2011

- Met with team; brainstorming session for feature list
- Proposed fleshed out account variants; "no accounts, link data only from experiments", "full standard account system", "background account system; only shows up on return to site"
- Distributed milestone 1 work

6 Thursday, September 15, 2011

- Set up Git to work on Cygwin
